Genetic Alliance CEO is Honored with the Luminary Award from the 2019 World Precision Medicine Congress

Washington DC – We are excited to share that, on January 20, 2019, our very own Sharon Terry was the recipient of the Luminary Award from the Precision Medicine World Conference for inspiring and leading the movement to build systems for individuals to access and share health data. The prestigious award recognizes an esteemed individual whose significant recent contributions to precision medicine has enabled the field to advance exponentially, improving health and extending life.

The conference aims to bring experts and authorities across the different sectors together to promote collaboration to further personalized medicine.

"I am thrilled to receive this award," said Sharon Terry. "I have had the opportunity to participate in the PMWC in the U.S. and Israel, and the knowledge sharing and networking is quite beneficial. Tal Bahar is a force of nature in gathering all of these luminaries, and I humbly accept this Luminary award on behalf of all who work to put people at the center of health research."

We take this opportunity to thank you. It is only through strong partnerships, collaborative efforts, and commitment that any of this is made possible.

Stay tuned for exciting news coming soon regarding enhanced capacity to meet the needs of the community. Together we will continue to build a different, healthy paradigm that is centered on, and serves, the people.
