

# TABLE OF CONTENTS

|                  |   |           |
|------------------|---|-----------|
| <b>PREFACE</b>   |   | <b>3</b>  |
| <b>CHAPTER 1</b> | <b>GENETICS 101</b>                       | <b>5</b>  |
| 1.1              | Cells, Genomes, DNA, and Genes            | 6         |
| 1.2              | Major Types of Genetic Disease            | 6         |
| 1.3              | Laws of Inheritance                       | 7         |
| 1.4              | Genetic Variation                         | 9         |
| <b>CHAPTER 2</b> | <b>DIAGNOSIS OF A GENETIC DISEASE</b>     | <b>11</b> |
| 2.1              | History and Physical Examination          | 12        |
| 2.2              | Red Flags for Genetic Disease             | 12        |
| 2.3              | Uses of Genetic Testing                   | 13        |
| 2.4              | Types of Genetic Testing                  | 13        |
| 2.4.1.           | Cytogenetic Testing                       | 13        |
| 2.4.2.           | Biochemical Testing                       | 14        |
| 2.4.3            | Molecular Testing                         | 14        |
| <b>CHAPTER 3</b> | <b>PEDIGREE AND FAMILY-HISTORY TAKING</b> | <b>15</b> |
| 3.1              | Importance of Family History              | 16        |
| 3.2              | How to Take a Family Medical History      | 17        |
| 3.3              | Pedigrees                                 | 17        |
| <b>CHAPTER 4</b> | <b>NEWBORN SCREENING</b>                  | <b>19</b> |
| 4.1              | Overview of Newborn Screening             | 20        |
| 4.2              | Newborn Screening Programs                | 20        |
| 4.2.1            | District of Columbia                      | 20        |
| 4.2.1.1          | Disorders Screened                        | 21        |
| 4.2.1.2          | Procedures and Follow-Up                  | 22        |
| 4.2.1.3          | Universal Newborn Hearing Screening       | 25        |
| 4.2.2            | Virginia                                  | 25        |
| 4.2.2.1          | Disorders Screened                        | 25        |
| 4.2.2.2          | Procedures and Follow-Up                  | 26        |
| 4.2.2.3          | Universal Newborn Hearing Screening       | 28        |
| 4.2.3            | Maryland                                  | 28        |
| 4.2.3.1          | Disorders Screened                        | 28        |
| 4.2.3.2          | Procedures and Follow-Up                  | 29        |
| 4.2.3.3          | Universal Newborn Hearing Screening       | 30        |
| <b>CHAPTER 5</b> | <b>GENETIC COUNSELING</b>                 | <b>31</b> |
| 5.1              | Role of Genetic Counseling                | 32        |
| 5.2              | Process of Genetic Counseling             | 32        |
| 5.3              | Patient Education                         | 33        |
| <b>CHAPTER 6</b> | <b>INDICATIONS FOR A GENETIC REFERRAL</b> | <b>35</b> |

|                   |  |           |
|-------------------|--|-----------|
| <b>CHAPTER 7</b>  | <b>PSYCHOLOGICAL AND<br/>SOCIAL IMPLICATIONS</b>                                     | <b>39</b> |
| 7.1               | Genetic Information vs. Other Medical<br>Information 40                              |           |
| 7.2               | A Lifetime of Affected Relationships 40  |           |
| 7.3               | Impact levels 41   |           |
|                   | 7.3.1 Patients 41  |           |
|                   | 7.3.2 Parents 41   |           |
|                   | 7.3.3 Family 41  |           |
|                   | 7.3.4 Community 42   |           |
| 7.4               | Coping Mechanisms 42   |           |
| <b>CHAPTER 8</b>  | <b>ETHICAL, LEGAL AND SOCIAL ISSUES</b>  | <b>45</b> |
| <b>CHAPTER 9</b>  | <b>PATIENT STORIES AND CONSUMER<br/>PROFILES</b>                                     | <b>49</b> |
| <b>CHAPTER 10</b> | <b>DC COMMUNITY HEALTH PROGRAMS<br/>AND CENTERS</b>                                  | <b>53</b> |
| <b>CHAPTER 11</b> | <b>CONSUMER FACT SHEETS</b>  | <b>61</b> |
|                   | Family History 62  |           |
|                   | Basic Genetic Information 64   |           |
|                   | Dominant and Recessive Genetic Diseases 65   |           |
|                   | X-linked Genetic Diseases 66   |           |
|                   | What is a Chromosome Abnormality? 67   |           |
|                   | Understanding Genetic Testing 68   |           |
|                   | Deciding Whether to Have a Genetic Test 69   |           |
|                   | Prenatal Diagnosis 70  |           |
|                   | Birth Defects/Congenital Abnormalities 71  |           |
|                   | Newborn Screening 72   |           |
| <b>APPENDIX</b>   |  | <b>79</b> |
|                   | A. District of Columbia Department of Health–Integrated<br>Health Data System 80     |           |
|                   | B. Classical Mendelian Genetics (Patterns of Inheritance) 81                         |           |
|                   | C. Genetic Testing Methodologies 82  |           |
|                   | D. Teratogens/Prenatal Substance Abuse 84  |           |
|                   | E. Prenatal Diagnosis 86   |           |
|                   | F. Maternal Serum Marker Screening 87  |           |
|                   | G. Single-Gene Disorders 88  |           |
|                   | H. Chromosomal Abnormalities 89  |           |
|                   | I. Pharmacogenomics 90   |           |
|                   | J. Cultural Competencies in Genetics 92  |           |
|                   | K. NCHPEG Principles of Genetics<br>for Health Professionals 93                      |           |
|                   | L. CDC Genomic Competencies for All Public Health<br>Professionals and Clinicians 99 |           |
